Revised April 2, 2007

<http://www.mbgnet.net/>

Information on the following biomes: rainforest, tundra, taiga, desert, temperate, grasslands, freshwater ecosystems (rivers & streams, ponds & lakes, wetlands) and marine ecosystems (shorelines, temperate oceans, tropical oceans). See addition links. From the Missouri Botanical Gardens

<http://www.ucmp.berkeley.edu/exhibits/biomes/index.php>

Online museum from the University of California @ Berkeley.

http://www.panda.org/news_facts/education/high_school/homework_help/webfieldtrips/major_biomes/index.cfm

Links to other Internet sites on biomes. WWF is one of the world's largest and most experienced independent conservation organizations, with almost 5 million supporters and a global network active in more than 100 countries.

<http://www.worldbiomes.com/>

Includes world map of biomes and images of biomes throughout the world. Check out the FAQ section which answers specific questions and may contain additional Internet links Selected by the SciLinks program, a service of National Science Teachers Association. Copyright 2001

<http://earthobservatory.nasa.gov/Laboratory/Biome/>

NASA supported site on biomes.

<http://www.bcpl.net/~sullivan/modules/biome/biomes/index.html>

Internet links from a school project.

<http://www.blueplanetbiomes.org/>

For biome information, click on the **Table of Contents**. For general information on biomes, click on **World Biomes**. Other links are listed at the end of the **World Biomes** section. Check out the bibliography section at the end of each biome for other references.
